- J) Treatment details : T1- Azadirachtin 0.15% EC @ 1125 ml/ha
T2- Azadirachtin 0.15% EC@ 2250 ml/ha
T3 - Azadirachtin 0.15% EC@ 3375 ml /ha
T4 - Derrimax @ 150 ml /ha
T5 - Neem Kernel Aqueous Extract
(NKAE) @ 5.0%
T6 - Untreated Control
- K) Details of Sampling : Red spider mite population was assessed at weekly interval by collecting 20 leaves from 20 bushes selected at random from each block. From each leaf, red spider mites were counted.
- L) Date of start : 19.12.2009
- M) Date of conclusion : 19.02.2010
- N) Dates of spray : I spray : 20.12.2009
II spray : 30.12.2009
- O) Method of Application : Required quantity of the formulation was mixed in water. The fluid was applied with a hand operated knapsack sprayer using a spray volume of 450 l/ha.
- P) Details of observations : Observations were made for a period of seven weeks from the date of first spraying.
- Q) Results : Results of the experiment are given in Table 1. The results indicated that, spraying of Azter (Azadirachtin 0.15 % EC) @ 2250 & 3375 ml/ha has significantly reduced the number of red spider mites, (*Oligonychus coffeae*) in comparison to untreated control.
